

Year 4 / Spring / Not everything is as it seems

Collaboration

We will work together to share our opinions and combine ideas so we can consider other people's ways of thinking as well as our own.

Possibilities

We consider the idea that anything is possible and how this belief will drive us to succeed. We will discuss how success is not always what you see.

Respect

We will share and listen to one another's ideas and opinions. We will learn about the beliefs and opinions of others and how these influence actions. We will consider how these affect our lives.

Technology

We will learn about how technology can enhance our knowledge and opinions by presenting things in different ways. Also how technology may not always be as it seems.

How might beliefs affect thoughts and actions?

Why do we interpret things differently?

Are things always how they first appear?

How do legends, myths and stories impact how we live our lives?

Can the same message be represented in different ways?
